7(c). SUM OF TWO NUMBERS VTO: 13008 DATE: 12th Aug 2020

Aim: To display the sum of two numbers in static Input System.

Algorithm:

Step 1: Start the program by including the class method.

Step 2: Declare the main method
i.e.
Public Static void main (String[] args)

Step 3: Declare 3 variables and assign values to the 2 variables

Ex: a, b, c;

int a=5, b=5; c;

Step 4: Add 'a' and 'b' and store the value in 'c'.

Step 5: Display the value of 'c' with the help of System.out.println(c);

Step 6: Run the program.

Step 7: END.

PROGRAM:-

```
public class main
```

```
{
```

```
    public static void main(String[] args)
```

```
    {
```

```
        int a = 13006, b = 2, c;
```

```
        c = a + b;
```

```
        System.out.println(c);
```

```
    }
```

```
}
```

Result:-

1310.

The Result in Output Screen.
